Exercise W01 | Basic HTML Exercise
Personal Student Web Page: Portfolio Starter
Prepared by: @JDMacam

References Needed: (a) Handout 01; (b) HTML online documentation

Purpose: Create a personal webpage that serves as the foundation of a future web portfolio.

Output(s):

- `index.html` *(submit by pushing to the GitHub classroom assignment repository)*

Required Web Page Content

Your HTML page must introduce **you as a college student** and present your **academic and professional identity** using only basic HTML. Edit the README file and add documentation in your code (15 pts deduction)

A. Document Structure

The webpage must include a valid HTML structure:

```
<!DOCTYPE>
<html>
<head> with:
        <title> (your name + ''Student Profile'')
        <meta charset="utf-8">
<body>
```

B. Web Page Sections

Section	Functions/Tasks	Technical Requirements
Student Profile	The page must display: • Your full name (main heading) • Your program and school (subheading) • A short personal introduction paragraph that mentions: o Year level o Academic interests or specialization o Career or portfolio goal	• Use at least one `<strong>` element • Use at least one ` ` element • Include one paragraph with a class attribute
Professional Links	The page must include a section containing professional and contact links. **Required links (at least 3):** • GitHub profile • Email address (using mailto:) • Facebook or LinkedIn profile	• Use `<a href="">` • At least one absolute URL • At least one relative URL (e.g., projects.html or portfolio.html)
Academic Information	The page must include a **<u>table</u>** presenting your academic details. **Required table content:** • Program • Year Level • Section • School Email • Primary Skill or Interest	• Use `<table>`, `<tr>`, `<th>`, `<td>` • Include table headers • Use border attribute • Use `colspan` or `rowspan` at least once
Contact Form	The page must include a basic contact form. **Form fields (minimum):** • Name • Email • Message	• Use `<form>` and `<input>` • Use placeholder attributes • Use ` ` for layout • No JavaScript or validation required
Portfolio Direction Statement	At the bottom of the page, include a short paragraph explaining: • How this webpage will evolve into a full portfolio • What future content will be added (projects, skills, certifications, etc.)
